

Single-package Nucleic Acid Extraction Kit

Automated extraction solutions for small batches of samples in the post-epidemic era

Flexible combinations:

Adjust the number of the samples flexibly according to actual needs, 1 to 16 samples can be extracted each time.

Cost reduction:

Reduce reagent waste, optimize shipping and storage costs based on actual needs.

Process optimisation:

Avoid time-consuming due to insufficient numbers of sample.

Applicable Instruments: Mole 32M

Extraction Time: 13-20 Min

Ordering Information

Ref No.	Product Description	Applicable Sample Type	Recommended Pathogens	Kit Size	Certificate
P08301T2001	Single package Nucleic Acid Extraction Kit (Pre-packed)	Swabs, sputum and stool	Human Genome and viruses	1 Test/Strip 40 Tests/Kit	CE
P08501T2001		Whole Blood	Human Genome and viruses		
P08801T2001		Serum and plasma, herpes exudate and cervical shedding cells	Human Genome, Monkeypox virus, Human papillomavirus and other viruses.
